

Sucess Story

They come up with something!

Create ideas and individuals software adaptation convinced Kronos

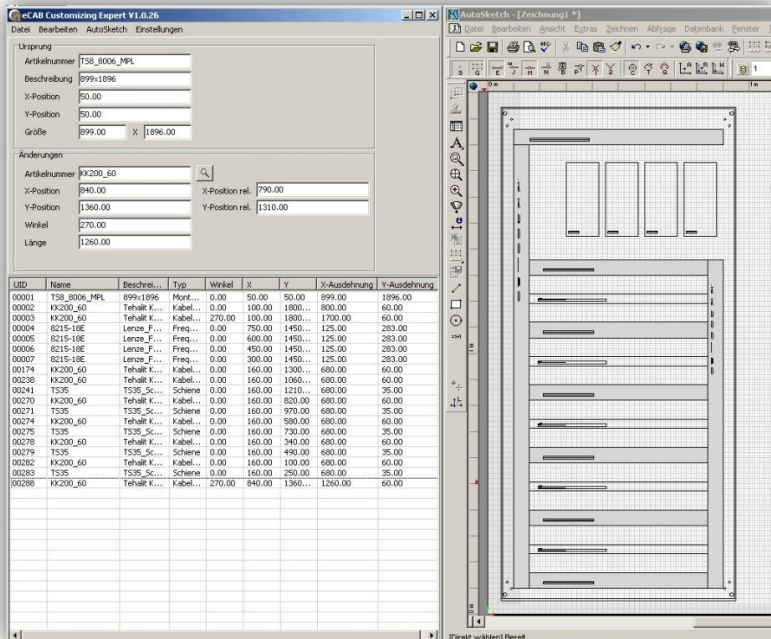

Krones AG, located in Neutraubling, Germany, is a worldwide leading manufacturer for bottling and packing machines for fluid and paste-like products in the food and luxury food industry, as well as in the chemical, pharmaceutical and cosmetic industry. More the 10.000 employees work for Krones worldwide.

2005 Krones was looking for a supplier for a working center to manufacture their on

cabinets. One of the compulsory requirement for the machine was the handling of indecomposable cabinets made of stainless steel. None of the producer from standard machines could not even partly fulfil Krones' requirements.

STEINHAUER accepted this challenge and worked out an individual solution for Krones.

Like this, for instance, a customised software adaptation was worked out, which permits a re-entry in the process after a tool change and the burring of a fixed link or and milling cut-outs. In addition to the actual technical realisation, this adaptation led to a considerable saving of time.

STEINHAUER got the acceptance from Krones and installed in 2006 the eCAB Giant working centre in Neutraubling.

By now two other machines from the successful eCAB WorkCenter series have been delivered to Krones.

Mr. Würzbauer, head of department at the Krones AG, realised by now that the STEINHAUER machines are reliable and is working without noteworthy trouble.
